Reshaping Health Care Delivery at Sutter Health
“We have to plan a medical campus for technology that hasn’t even been invented yet. Siemens was brought on board as a partner at the beginning of the project to ensure the infrastructure was in place to stay current throughout the 21st century. We’ve designed a building that has a lot of flexibility and capability to adapt to serve our patients.”

– Larry Maas, Administrator, Master Plan

PROFILE
Sutter Health is one of the nation’s leading not-for-profit networks of community-based health care providers, delivering high-quality care in more than 100 Northern California communities. It is also the regional leader in infant deliveries, neonatology, orthopedics and pediatrics services. Sutter Health supports more than two dozen locally run acute care hospitals as well as physician organizations, medical research facilities, regionwide home health, hospice and occupational health networks, and long-term care centers.

At Sutter Health, providing quality care is their top priority. While striving to achieve and maintain this excellence of care, Sutter has been the recipient of numerous national and regional awards from prestigious organizations such as Integrated Healthcare Association, Solucient and HealthGrades.

SUTTER HEALTH OBJECTIVE
To lead the transformation of health care to achieve the highest levels of quality, access and affordability.

Sutter Health continually works to exceed customer expectations by delivering premier clinical quality and maintaining the highest levels of safety. They create, seek out, and adopt new ways to provide value; while delivering health care efficiently and using resources responsibly. By 2012, Sutter Health will create a new $650+ million state-of-the-art medical campus in Sacramento. The Sutter Medical Center urban village project will include the new Anderson Lucchetti Women’s and Children’s Center and the comprehensive renovation of Sutter General Hospital and the Sutter Cancer Center. The Anderson Lucchetti Center will offer the highest level of neonatal and pediatric intensive care and other services. When complete, the remodeled Sutter General and Cancer Center will house new space for orthopedic, spine, neuroscience, cancer, transplant and medical/surgical services.

SIEMENS SOLUTIONS
Siemens’ advanced building and clinical technologies provide integrated systems that provide Sutter Health the tools to optimize facility operations, lower costs and enhance clinical operational effectiveness.

The Sutter Health/Siemens alliance supports Sutter’s initiative for streamlining building operations as well as the delivery of the most sophisticated health services across the entire continuum of care. Siemens’ technologies support Sutter’s objectives for optimizing clinical care outcomes and patient safety in the most modern, efficient facilities possible.

SHARED INTENTION OF ALLIANCE
Sutter and Siemens share a strong technology partnership and the alliance allows for the continued growth of that relationship. Sutter Health embraces the use of technology to enable patient care improvements and reshape how health care is delivered. Their commitment to employ innovative technologies, including Siemens medical equipment, laboratory diagnostic equipment, building automation technologies, energy efficiency equipment, lighting, and more, enables their caregivers to provide top quality care to patients.
